

I am against the transfer of Voom assets to Echostar. I am not currently a satellite user but have been wanting to go to Voom. I have held off because of the litigation pending with them. I believe the more competition, the better. Voom has continued to expand and has added many new channels in the past few weeks. They are the leader in HDTV programming and Voom LLC is definately committed in keeping the venture alive. Please allow Voom LLC to keep VOOM alive and deny the transfer of licenses to Echostar. thank you.
